THE ANIMUS OF ALPHA OMEGA ALPHA

by the founder
Dr. William W. Root
Detroit.

In the first decade of the twentieth century more progress has been made in advancing the standards of medical education in America than in all the preceding years put together. Of all the influences at work during this marvelous period but one organized effort has arisen within the student body and no future history of medicine can be complete without some reference to this influence. This is the Alpha Omega Alpha Society.

At five o'clock in the afternoon of the twenty-fifth day of August, 1902, six seniors* met in the Bacteriological Laboratory of the College of Physicians and Surgeons of Chicago to register definitely their protest against a condition which associated the term "medical student" with rowdyism, boorishness, immorality, and low educational ideals and to pledge mutually to do what they could to remedy this condition. This protest arose entirely within the student body, no member of the faculty having been consulted. It was part of the original plan to give this organization the form of a non-secret, honorary medical fraternity in order that the added prestige accompanying this idea might enable it the better to do its work. This idea however was to be merely a means to an end, the real motive of the organization always being the advancement of moral and educational standards both in the medical school and in the profession.

Membership is based upon scholarship as shown by the faculty records of the medical course, but the election to membership is left with the student members of the fraternity since they alone know of dishonesty in examination or immorality on the part of candidates, either of which precludes membership. A *small number* of physicians may be selected from those who have performed some distinguished service to their fellows. Women are admitted on the same terms as men. In fact race, color, creed, sex

* The members chosen before formal organization were William W. Root, Charles L. Williams, Ernest S. Moore, Benjamin Thomas, George H. Howard, John E. Haskell, Will H. Moore, Wenzel M. Wochos and Milton W. Hall. Of these, Howard, Haskell and Hall were absent from the August meeting.

and social standing form no barrier to membership, the sole qualifications being scholarship and character.

To quote from Dean Quine of the parent chapter, "This order is for the men who have made good" and these men form a select band, whose constantly increasing influence is helping to bring nearer the day when not only a very few medical schools in this country, as at present, but the larger number of them, shall rival any in the world.

THE ORIGIN OF THE ALPHA OF OHIO CHAPTER.

During February, 1903, Mr. Burchard Hayes Roark, a charter member at Rush Medical College, made a trip east and organized chapters at Western Reserve University, Jefferson Medical College, and the University of Pennsylvania. The original applicants for a charter at Western Reserve formed a group of five men, H. J. Gerstenberger, W. C. Hill, J. A. Sipher, W. P. Chamberlain, and H. H. Heath. They had been suggested to Mr. Roark by Prof. W. T. Howard, and ranked in a class of thirty-two seniors as the highest in scholastic standing.

After its foundation in 1903, the chapter remained in a somewhat quiescent state until 1906. This was due, partially at least, to the lack of official support from the Medical Faculty, who very naturally hesitated in endorsing a fraternity authoritatively until it had shown a policy of entering only the medical schools with the highest requirements and most efficient instruction.

During this period the formalities of an organization were not carried out fully though members were elected in strict accordance with the Constitution. In 1906 local interest was again aroused and a formal reorganization was effected. An exacting and rigid set of by-laws governing the nomination and election of new members was enacted in 1907, and now that the high ideals of the general fraternity were made evident, the support of the Faculty and the sympathy of the University authorities were obtained. In 1908 the names of new members were printed in the University Commencement program for the first time.

ORGANIZATION AND PROCEDURES

of Alpha Omega Alpha

Nature.

Alpha Omega Alpha is a non-secret Honorary Society, bearing the same relation to Medical Schools which Phi Beta Kappa does to literary institutions and Sigma Xi to scientific schools. Election to membership is based entirely upon scholarship, *moral qualifications* being satisfactory. The election of members is so safeguarded that no other factors are permitted to enter into consideration, and influence, fraternity affiliations, or social attainments will avail a man nothing in the struggle to win the coveted key.

Object.

"This organization, while possessing exclusive features as regards scholarship and other high standards of membership, adds to these the definite mission *to encourage high ideals of thought and action in schools of medicine and to promote that which is highest in professional practice.* As students, members are to avoid that which will make them unworthy of their calling and to further the same spirit among fellow students. As practitioners they are to maintain and to encourage the lofty ideals set before them by the revered father of medicine, Hippocrates; to show respect for other members of their calling; to advocate high requirements for entrance to the course in medicine and for graduation; in short to do what they can to exalt and to ennoble the profession.

A commercial spirit and all departures from medical ethics are to be avoided, and the purely scientific, the philosophical, and the poetical features of the profession to be cultivated."

(From Sect. I, Article II, National Constitution, Italics ours.)

Requirements for Membership.

The National Constitution, provides that in the election of members, the requirements shall be scholarship and strength of character.

The constant contact which exists between the alumni of Alpha Omega Alpha who are holding teaching or dispensary posts, and the students

from the first year of their medical residence, permits such close observation of possible candidates that the chapter is enabled through its alumni members to judge accurately of the qualifications of candidates.

Every effort has been made to ensure the election of worthy members. While the admission of third-year students is permitted by the National Constitution, this privilege has not been used by the Alpha of Ohio. A few men have been chosen at the beginning of the fourth year, but in most cases election has been postponed until the completion of the entire course. The reason underlying this is that some men do their best work during the last year. This is largely practical clinical work, and the fraternity is able to secure a better selection of men by deferring election until possible candidates have shown their ability.

Proportion of Members.

The total number of members from a given class is not permitted to exceed one-sixth (1-6) of the number of men graduating in the class. One-half ($\frac{1}{2}$) of this number, i. e. 1-12 of the class, may be chosen during the last half of the Junior year.

Men from other Schools.

According to the By-laws of our Chapter, men who have transferred from other medical schools at the end of the first year are not eligible for election until they have completed the entire work of the Sophomore and Junior years in residence in the Medical Department of Western Reserve University. A man who enters this school at the end of the Sophomore year, or later, is not eligible to election. Furthermore, the National Constitution provides that no student who has taken work at an institution where there is a Chapter of this Fraternity shall be elected to membership in another chapter until the first chapter by a two-thirds (2-3) vote concurs in his election.

Method of Nomination.

Some time ago the Chapter entered into an agreement with the Faculty—this agreement to have the binding effect of a contract—that a committee of the Faculty should have the sole

privilege of *nominating* new members. The grades of the graduating class are compiled from the University records by the Counselor, who is an officer of Alpha Omega Alpha and also a member of the Faculty. He reports the names of the highest third of the class in the order of their average standing for all the courses taken in the Medical Department of Western Reserve University. Candidates not so nominated by the Committee of the Faculty cannot be elected.

Election by the Chapter.

At a regular meeting held after the completion of the final examinations, the Chapter elects by ballot from the list of nominees provided by the Faculty as many members as it may see fit to choose at this time, but it may never exceed the quota permitted by the Constitution. The balloting upon candidates must be in order of nomination which is, in order of average grade attained in scholarship. Any candidate may be rejected for immorality, lack of character or force of personality; but such disqualifying characteristic must be openly and fully stated to the Chapter by those members casting the negative votes and full discussion must be permitted. In case of a rejection, the candidate next in order upon the list is then placed before the chapter for ballot. There can be no substitution or change in the order of the nominees provided by the Faculty Committee. The *power of election* is vested solely and entirely in the Chapter; the *power of nomination* in the Faculty Committee. Therefore a candidate has to be approved by both of these separate and distinct bodies before securing election.

Should the negative ballot be withdrawn, the candidate may be ballotted upon at a subsequent meeting provided that the full quota allowed to the candidate's class has not been elected already. Mere unpopularity is not allowed to serve as a bar to election.

Publication of Elections to Membership.

The names of those members of the graduating class who have been nominated by the Faculty and elected by the Chapter are published in the Commencement Program together with the announcements of the usual University Honors.

Status of the Chapter in the University.

The nomination of candidates by the Faculty, the fact that the Counselor is a member of the Faculty and its Secretary, and the recognition afforded by the University by announcing the Annual Meeting of the Chapter in the official schedule of the events of Commencement week, and by publishing the names of new members in the Commencement program, places this Chapter upon a plane with Phi Beta Kappa and Sigma Xi. Election to it thus becomes a semi-official honor, and is at present the *only recognition of scholarship* granted during the course or upon graduation.

Organization.

The National Constitution provides that the Chapter shall be divided into two Sections, Alumni and Undergraduate. A member of the Faculty is elected to serve as Counselor for three (3) years. The two sections usually meet together, and in this school the division is a nominal one. The fact that the majority of our graduates serve in the hospitals of the city, and afterwards become attached to the school or to some of the affiliated dispensaries, ensures a more or less permanently interested body of alumni. The alumni too have every opportunity of observing the work and personal behavior of students who may become candidates for election at a later date and thereby become well qualified to advise the Undergraduate Section in the selection of members.

Annual Dinner.

According to custom, the annual dinner is given in the fall. At this time the new members are the guests of the Chapter. The annual "Alpha Omega Alpha Address" is delivered by a prominent alumnus or honorary member. The following have been speakers in the past:

- 1907. Associate Primarius Walter B. Cannon, of Harvard Medical School.
- 1908. Primarius Winfield S. Hall, of Northwestern University Medical School.

THE OATH OF HIPPOCRATES.

The following oath, read at every initiation, represents the spirit of our order.

I swear by Apollo, the physician, and Aesculapius, and Health, and All-heal, and all the gods and goddesses, that, according to my ability and judgment, I will keep this oath and stipulation: to reckon him who taught me this art equally dear to me as my parents, to share my substance with him and relieve his necessities if required;

to regard his offspring as on the same footing with my own brothers, and to teach them this art if they should wish to learn it, without fee or stipulation, and that by precept, lecture and every other mode of instruction, I will impart a knowledge of the art to my own sons and to those of my teachers, and to disciples bound by a stipulation and oath, according to the law of medicine, but to none others. I will follow that method of treatment which, according to my ability and judgment, I consider for the benefit of my patients, and abstain from whatever is deleterious and mischievous. I will give no deadly medicine to anyone if asked, nor suggest any such counsel; furthermore, I will not give to a woman an instrument to produce abortion. With purity and with holiness I will pass my life and practice my art. I will not cut a person who is suffering with a stone, but will leave this to be done by practitioners of this work. Into whatever houses I enter I will go into them for the benefit of the sick and will abstain from every voluntary act of mischief and corruption; and further from the seduction of females or males, bond or free. Whatever, in connection with my professional practice, or not in connection with it, I may see or hear in the lives of men which ought not to be spoken abroad, I will not divulge, as reckoning that such should be kept secret. While I continue to keep this oath unviolated, may it be granted to me to enjoy life and the practice of the art, respected by all men at all times, but should I trespass and violate this oath, may the reverse be my lot.

Hippocrates was born on the island of Cos about 460 B. C., and died about 357 B. C., at Larissa, in Thessaly. This, the greatest medical name of antiquity, is that of the first scientific physician, who did much to free the art of healing from ignorance and superstition, and his works still are quoted frequently by our ablest writers.
